

Attention: Biology and Chemistry majors

Do you know what you're going to do with your degree?

If you love working in the lab and like being part of the medical fact-finding process, consider becoming a **Clinical Laboratory Scientist (CLS)**.

What's does a CLS do?

CLSs perform laboratory analyses in all departments of the clinical laboratory, using samples from the human body.

Are there jobs available?

Yes! There is a severe shortage of Clinical Laboratory Scientists (CLS) in the workforce, due to retirements. There are thousands of CLSs working in the greater S.F. Bay Area.

What are the typical salaries?

Starting salaries for licensed CLSs in the S.F. Bay Area range from **\$63-78K**.

Find out more about how you can become a licensed CLS at the
CLS Internship Program Advising Sessions in SCI 206

Friday, September 25: 12:00 - 1.00 p.m.

Thursday, October 8: 5:00 - 6:00 p.m.

Friday, November 6: 12:00 - 1.00 p.m.

Monday, December, 7: 5:00 - 6:00 p.m.
